In competitions with multiple relays that take place over two or more days, where it is not possible to have the top eight competitors remain for a single eight-person final at the end of the competition, the Competition Program may, alternatively, provide that the competitors with the eight highest scores for that day will complete a ten-shot final round at the end of each day. The same finals procedures that are given in this Rule must be used. If this special finals procedure is used, the final round scores will be added only to the scores of the shooters who had the eight highest 3x10 or 3x20 scores overall to determine the final ranking of those eight competitors. The final round scores of all other competitors may be published in the results bulletin for information purposes, but will not be counted in the final rankings.
